

Aldeburgh Repairs and Maintenance

Aldeburgh, Suffolk

What are we updating you about?

Coastal Partnership East are the coastal management team for East Suffolk Council (ESC), North Norfolk District Council and Great Yarmouth Borough Council and are responsible for coastal management. We have appointed East Suffolk Water Management Board (ESWMB) to complete repairs and maintenance of coastal assets along the Suffolk coast, which are owned or managed by ESC. ESWMB will be completing works at Aldeburgh as part of that contract.

Where is this work happening?

A map of where the work is taking place is on the back of this factsheet. The work will take place along the slabbed pathway to the seaward side of Crag Path, Aldeburgh. There will be a temporary site compound in King Street car park. The access ramp at the southern end of the work area may be closed at times during the works, but we will endeavour to allow access to the beach at this point as much as possible. Access steps over the seawall and onto the path within the work area will be closed for the duration of the works.

When are we doing the work?

Repair and maintenance work is due to start from 3rd July 2024 and last approximately 2 weeks.

What will we be doing?

ESWMB will be removing existing slabs and kerbs and replacing them with new kerbs and tarmac. Some Heras fencing panels with mesh will be placed on the kerb on the landward side of the path to aid with dust and debris suppression. There will be tarmac deliveries and grab lorries to remove rubble travelling from Crag Path car park to the work area 8am onwards.

We will work hard to keep any inconvenience to a minimum and ask the public to please take note of the contractor's signage when work is happening.

Why are we doing this work?

This work will improve public safety and is an important part of ESC's commitment to ensure that the coastal assets the Council is responsible for are working effectively and are safe for the public. This will help to protect our beautiful and important coastline economically, environmentally and for the enjoyment of communities and visitors for generations to come.

Undertaking regular targeted maintenance means that we can maximise the lifespan of coastal protection assets, ensuring that we make the most of every pound spent and achieve a better return on public investment. We are supporting the safeguarding of life and local economies by making sure that the Council's coastal assets are in the condition needed for continued protection.
